

SWASTI SADANAND

+1 (919) 526-5650 ◇ Raleigh, NC ◇ swasti.s245@gmail.com ◇ [LinkedIn](#) ◇ [GitHub](#)

OBJECTIVE

Master's student in Computer Science seeking Software Development opportunities, with hands-on experience building full-stack applications, cloud-based systems, data pipelines, and AI/ML solutions using Python, JavaScript, C#, React.js, Node.js, .NET, and AWS.

EDUCATION

Master of Computer Science, NC State University, Raleigh, NC

Coursework: Algorithms, Software Engineering, Devops

May 2027

GPA: 3.6/4.0

B.E. in Computer Science, BMS Institute of Technology and Management, Bangalore, India

Coursework: Data Structures, Discrete Mathematics, Data Science, DBMS

2021 – 2025

GPA: 9.47/10

SKILLS

Languages Python, Java, C#, C, JavaScript, SQL,

Web/Frameworks React.js, Node.js, Express.js, .NET, Django, Flask, HTML, CSS, XML, PHP

Tools/Platforms Git, AWS, SonarQube, Windows, Ubuntu

Data and ML Pandas, NumPy, Matplotlib, OpenCV, PyTorch, TensorFlow, Scikit-learn

PROFESSIONAL EXPERIENCE

LexisNexis Legal & Professional, Software Engineer Intern

Raleigh, NC | June 2026 – Aug 2026

- Diagnosed and resolved data-integrity defects in an email indexing pipeline involving .msg and .eml attachment formats, improving reliability of document processing.
- Developed front-end enhancements and enforced code-quality standards using SonarQube, improving maintainability and reducing technical debt.
- Architected a serverless AWS Lambda pipeline that reconciles data across document versions using pattern matching and ML-based semantic search to relocate shifted references and classify matches for human review.

Pinaka AI, Data Analyst Intern (Remote)

Bangalore, India | Feb 2025 – June 2025

- Designed a financial analytics platform powered by a hybrid Predictive AI + Generative AI system for risk prediction on accounts receivable/payable data, identifying credit risk, delinquency, and payment behaviour patterns.
- Engineered and preprocessed structured financial datasets (invoices, payments, transaction logs) and trained predictive risk models to support credit scoring, delinquency detection, and customer payment behavior analysis.
- Fine-tuned an LLM to support natural language interaction for financial insights, enabling CFOs and analysts to generate conversational summaries, risk explanations, and recommendations with 96% accuracy along with dashboards, improving executive decision-making and reporting efficiency.

Ametek Instruments India Pvt Ltd, Software Intern

Bangalore, India | Oct 2023 – Nov 2023

- Designed and developed a C# and WPF desktop utility enabling bidirectional conversion between .txt and .prf file formats, automating a previously manual workflow and improving reliability for end users.
- Owned the full software lifecycle from requirements gathering to deployment, delivering a robust and user-friendly internal tool.
- Built a React.js and Node.js web interface for the file-conversion utility, enabling browser-based .txt/.prf conversion.

PROJECTS

NextStep Bot

- Built a career guidance chatbot using Python and NLP techniques powered by Mistral-7B LLM, integrating a RAG pipeline to fetch relevant context from a curated knowledge base and ground responses in accurate, up-to-date information.
- Fine-tuned the model using QLoRA on domain-specific datasets to deliver context-aware, personalized recommendations for higher studies and job placements, and provide standard templates for resume building.

Technopired

- Designed an interactive educational platform for dyslexic children using Python in a Flask framework, integrating gamification, multisensory learning and adaptive personalization.
- Built a user-friendly interface with progress tracking system to improve literary outcomes and applied inclusive design principles and accessibility-focused features to support diverse learner needs.
- Awarded 2nd place in a university-level Project Based Learning Competition for innovation and impact in education technology.
